

A GUIDE FROM JENNY

A little honestly. *About your body. Your energy. And you.*

This handbook isn't meant to overwhelm you.

It's meant to give you a first honest look

at something that might have been quietly calling you for a while.

"I've put together here what I wish someone had explained to me at the beginning of my own journey. Simply. Without pressure. And with the feeling that you don't have to understand everything at once."

Jenny Wierzbicki · Travel 2 Transform

Chapter 1

Ayurveda.

Or: why your body isn't like everyone else's.

Over 5,000 years old. Still more relevant than most diet plans.

Ayurveda comes from Sanskrit and means "knowledge of life". The core idea is actually quite simple: every person has their own individual nature. And health means – living in harmony with that nature. Not against it.

In Ayurveda, this nature is called your Dosha. There are three of them. Most people have one or two that dominate. And once you know yours – many things suddenly make sense. Why cold foods exhaust you. Why stress hits you differently than others. Why you feel better with warm meals.

The three Doshas.

Vata · Air & Ether

Vata types are creative, quick-thinking and full of ideas. They love change and new things. But they can also easily become scattered, anxious or restless – especially when life gets too hectic or cold. Vata needs warmth, regularity and grounding.

Pitta · Fire & Water

Pitta types are passionate, focused and driven. They pursue goals with fire. When things get too hot – literally or emotionally – they can become irritable, impatient or prone to inflammation. Pitta needs cooling, rest and moments of letting go.

Kapha · Earth & Water

Kapha types are stable, loyal and deeply caring. They anchor in people's lives. Their challenge is getting started – they can fall into sluggishness or inertia when life feels heavy. Kapha needs movement, lightness and stimulation.

"A note: Ayurveda doesn't put people in boxes. It shows tendencies. And it gives you a language for things your body has been trying to tell you for a while."

Chapter 2

Chakras.

Energy centres. Not as mystical as it sounds.

You've probably felt when something is "off" somewhere. Chakras are the map for that.

"Chakra" comes from Sanskrit and means wheel or circle. There are seven main chakras – energy centres that run from the base of the spine to the crown of the head. Each one stands for a specific area of life.

When they're open and balanced, energy flows. When one is blocked – you feel it. Not always as pain. Sometimes as a feeling you can't quite name. A heaviness. A numbness. A constant "something's not right here".

■ Root Chakra	Safety, grounding, the feeling of belonging here.
■ Sacral Chakra	Creativity, emotions, the ability to feel and express.
■ Solar Plexus	Self-worth, personal power, "I am allowed to be here."
■ Heart Chakra	Love, compassion, the ability to open yourself.
■ Throat Chakra	Communication, truth, "I am allowed to say what I feel."
■ Third Eye	Intuition, clarity, trusting your own perception.
■ Crown Chakra	Connection to something greater. Meaning. Stillness.

"You don't have to believe in all of this. But pay attention to which of these descriptions resonates somewhere inside. That's often where the journey begins."

Chapter 3

Reiki.

Energy work. And why I do it the way I do.

I'll be honest with you about this one.

Reiki is a Japanese healing method from the early 20th century. "Rei" means universal, "Ki" means life energy. The idea: there's a universal energy that flows through everything. And a trained practitioner can direct it – with their hands, their intention, their presence.

I know that sounds abstract. And I used to be sceptical too. Until I first experienced what happens in a real session. Something relaxes that you've been holding tight for a long time. Something loosens. Not because someone told you to – but because the space was created for it.

What Reiki can do.

- ◆ Deep relaxation – when the nervous system finally gets to rest
- ◆ Supporting the release of emotional blockages
- ◆ Better sleep and more inner calm
- ◆ Working specifically on blocked chakras
- ◆ A sense of being held – without having to do anything

"I don't offer Reiki as a miracle cure. I offer it as a space – where something can shift that often can't shift in everyday life."

Chapter 4

Yoga.

More than the mat.

"Yoga" means union. Body, mind, soul – not separate.

Yoga is over 5,000 years old and has developed into many different styles. What they all have in common: they work with breath, movement and presence. Not just to stretch the body. But to calm the mind and connect with something deeper.

The right style for you depends on where you are right now. What your body needs. What your nervous system needs. And yes – your Dosha and your chakras play a role too. That's why my yoga plans aren't one-size-fits-all. They're built around you.

Yin & Restorative

Long holds, deep stillness. For when you need rest more than movement.

Vinyasa & Power

Dynamic, building heat. For when you need strength and energy.

Hatha

Balanced, classical. For when you want structure and clarity.

Kundalini

Breath, mantra, deep spiritual practice. For when you want to go further.

"You don't need to start with the "right" style. You just need to start. And then you feel your way toward what your body is asking for."

Chapter 5

How it all fits together.

The Travel 2 Transform system.

Three ancient systems. One journey. Yours.

Ayurveda shows you what your body needs. Chakra work shows you where your energy is blocked. Yoga gives you the practice that brings both into movement. And Reiki creates the space in which deeper release can happen.

None of it works in isolation. Together they form something that's greater than the sum of its parts. I've been working with these three systems for years – and every time I see what happens when someone genuinely engages with all three, I know why I do this work.

Understand

The quiz reveals your Dosha, your chakra balance and your yoga type.

Recognise

Your Reset Plan shows where the blockages are and how to dissolve them.

Change

Nutrition, yoga, daily rituals – tailored specifically to you.

Experience

The retreat is where everything you've prepared becomes real.

And now?

You don't have to change everything
right now.

But you can start looking a little more honestly.

The free test takes 2 minutes.

It gives you a first real picture of where you are right now.

*And if you feel afterwards: okay, I want to go deeper –
then I'm here.*
